# EXTERIOR B.O.S.S.

**Durable to endure outdoors.** Our sturdy exterior solution rests on the backside of your building and is protected by a metal enclosure without taking up back of house space.

### System Features:

- 2250 lbs. / 300 gal. used cooking oil storage capacity
- Exterior collection container is protected by a metal enclosure to enhance building layout
- Universal door can be placed on either side of shed for access to inspect and maintain unit and Co2 Tank
- Stainless steel bottom on shortening storage tank for extended life
- For use with liquid or solid shortening
- Equipped with "full tank" shut off and heater
- Proprietary "Anti-theft Fitting" allowing only a DAR PRO truck hose to remove used cooking oil
- Shed color options
- Operation/Installation Manual and Storyboard

### System Requirements:

- Height: 82" / Width: 78" / Depth: 32"
- 110-volt / 20 amp dedicated circuit within 6' of tank
- Pre-install survey and service agreement

### System is:

- UL142 certified for NFPA 30 compliance

### Direct Pump System

This system enables the filter pump on your fryer to connect directly to the Exterior B.O.S.S. tank and transfer the spent oil with one touch of a button. It's a safer and more efficient process.
