### **Q: What is your favorite part about your role?**

A: That's easy – interacting with everyone in the business. I get to see all sides of the company and learn how I can best help them. I get to talk to a lot of people, I've gotten to interact with everyone. I always learn something new, like how to interact with people in a positive way. You work with so many personalities, so that knowledge is forever growing and evolving.

### **Q: What is your favorite part about working for DAR PRO?**

A: I think the working environment and culture. They are supportive of your ambitions and goals, and they want to see you succeed. It ties to my role, since I get to support everyone and have so much exposure to people. That opportunity for growth and support is there if you look for it.

### **Q: In your own words, what does sustainability mean to you?**

A: Every time I hear that word, I go back to a quote from Honda: "Be a company that the world wants to exist." Sustainability goes hand in hand with sales sufficiency. You're putting into the system and the system gives back to you. You're able to sustain yourself without worrying that things will stop or run out.

### **Q: What do you like to do outside of work to unwind?**

A: I love the outdoors – hiking and camping. I also love motor sports and anything with an engine. When I'm inside, I play video games. I like to play story based games, anything that takes your mind off of the real world.

### **Q: What is your favorite fried food?**

A: Normally it's just homemade French fries. Sweet potato, russet. I also like homemade eggrolls. Oh, and Jack in the Box tacos.
