### GENERAL INFORMATION

Nature Safe's 16-0-2 is a unique blend of three nitrogen sources: animal proteins, ammonium sulfate, and urea stabilized nitrogen. The product is based on the slow release nitrogen of our high quality animal proteins. Ammonium sulfate is incorporated into the organic base to improve both color and growth response. The urea stabilized nitrogen will deliver a slow and consistent release for up to 8 weeks.

General Use Fertilizer. Our products contain ingredients safely recycled from animal sources.
