Decoding the collagen language for targeted health benefits.
NEXTIDA™ is an innovative platform of specific collagen
peptide compositions that act as a GPS, guiding the body back
to balance, naturally.

Rousselot
| by Darling Ingredients

DID YOU KNOW THAT COLLAGEN HAS UNKNOWN BENEFITS?

With over 130 years of experience, Rousselot is a pioneer in collagen-based solutions*. Today, Rousselot is focused on decoding the collagen language and identifying its associated unique health benefits.

Collagen plays a major structural role in our bodies and **its benefits go well beyond structure and strength**. Collagen peptides navigate the body, transmitting messages involved in numerous physiological functions.

As a result, they can exert a beneficial health effect well beyond its known nutritional value, and even largely exceeding what has already been shown in skin, bone and joint health.

Therefore, Rousselot is going beyond the known by uncovering new modes of action and delivering new targeted health benefits.

Identifying new health benefits mediated by specific collagen peptide compositions

Rousselot is leading the way in decoding the collagen language and opening opportunities in new markets.

*Upcycled animal-derived collagen solutions

INTRODUCING NEXTIDA, THE INNOVATIVE PLATFORM OF SPECIFIC COLLAGEN PEPTIDE COMPOSITIONS

Mastering our body's natural use of bioactive peptides to restore balance, Rousselot is introducing Nextida, **a new range of specific collagen peptide compositions**. The scientists at Rousselot have identified specific compositions that can **trigger a natural response** and hence, deliver **targeted health benefits**.

The process behind **decoding the collagen language** is built and backed by science.

1 **Uncover** the link between collagen peptides and human physiology:

Understand what causes body imbalances

Determine how collagen peptide compositions can help restore body balance

2 **Develop** an extensive library of **specific collagen peptide compositions**:

Collagen

Collagen peptide compositions library

3 **Test different** collagen peptide compositions **in cell models** that mimic a specific mode of action (MOA). **Screen and select** the most effective candidate:

Different collagen peptide compositions

Testing mode of action in cell model

Selected specific collagen peptide composition

4 **Assess** the candidate in preclinical studies **to confirm the tested MOA and targeted health benefits**:

Selected specific collagen peptide composition

Pre-clinical testing

Confirm efficacy of collagen peptide composition

5 **Perform human clinical** trials to confirm **efficacy and safety**:

Unique collagen peptide composition

Clinical trial testing

Confirm efficacy and safety

Nextida, specific collagen peptide compositions with **NEW** targeted health benefits.

NEXTIDA, UNIQUELY DESIGNED TO ANSWER CONSUMERS' HEALTH NEEDS

AN INNOVATIVE PLATFORM OF SPECIFIC COLLAGEN PEPTIDE COMPOSITIONS

nextida.GC

Targeting glucose metabolism

Next compositions with **targeted health benefits**

nextida.GC

AVAILABLE SOON

Targeting glucose metabolism in a natural way, Nextida.GC will be the first commercialized specific collagen peptides from the Nextida platform.

Nextida.GC aims to reduce the post-meal blood sugar spike.

Pre-clinical studies have demonstrated the incretin effect in which GLP-1 plays a crucial role.

Don't wait. Ask our experts for more information and register online to **be the first to learn about the Nextida.GC study results** and when it becomes available in your region.

ABOUT ROUSSELOT HEALTH & NUTRITION

As Rousselot's strategic segment dedicated to health and nutrition, we are committed to developing innovative ingredients answering today's demand for solutions offering proven efficacy, full safety, and premium quality. Our customers can rely on best-in-class products backed by trusted science, as well as on our expert support in formulation, product development, and regulatory advice. Our range of products includes Peptan®, Peptinex®, ProTake®, Colartix® and now Nextida™, a range of specific collagen peptide compositions, for a healthier tomorrow.
