## What is joint cartilage?

Cartilage is an extremely strong, resistant and flexible tissue.

## What is Type II collagen?

Type II collagen originates from cartilage and is found in a natural matrix together with glycosaminoglycans (GAGs): chondroitin sulfate and hyaluronic acid.

- ✓ Bioactive
- ✓ Made in Europe
- ✓ Highest quality standards

Peptan IIIm is a hydrolyzed collagen type II matrix, a unique and innovative joint health ingredient, that contributes to 3 key joint health dimensions.

**Protects cartilage**

Peptan IIIm helps to keep the cartilage matrix of collagen type II and aggrecan intact.

**Provides cushioning and lubrication**

Peptan IIIm stimulates joint cells to produce lubricating matrix, cushioning the joint environment for easy movement.

**Reduces inflammation**

Signaling peptides act as messengers to reduce inflammation.

**SETTING A NEW JOINT HEALTH STANDARD**

**Single ingredient** with **triple** benefits of the full matrix.

**Dosage level** (1-3g/day) suitable for tablets and capsules.

**Highly soluble** suitable for a broad range of liquid applications.

**Application versatility** one product, multiple applications.

**Safe non-drug** of natural origin.

**Fast action** within the joints.

**Absorbed** by the body and working on location.
