

OUR Mission

EnviroFlight develops high quality, sustainable insect-based ingredients for animals and plants in a socially responsible way. Our systems upcycle regionally available by-products from human and animal food industries to produce high quality ingredients while minimizing the environmental and financial impacts of animal protein production. By doing so, EnviroFlight contributes to the health of our planet and the people of our world.

ENVIROFLIGHT®

Always Nutritious, Sustainable and Palatable

At EnviroFlight, we produce a variety of high quality Black Soldier Fly larvae (BSFL) products including:

EnviroBug™

EnviroMeal™

EnviroFrass™

EnviroOil™

Our sustainable, high protein, nutrient rich, AAFCO approved, Black Soldier Fly products can be used as an ingredient in manufactured animal feeds or as a supplement to be used in a complete diet for a variety of species including pets, poultry, ruminants and salmonids.

Efficiency of the Black Soldier Fly

Annual land, feed & water usage of cattle, swine, poultry and black soldier fly

Land
One square equals 10M² per/kg of body weight produced

Feed
One square equals 1 kg of feed/kg of body weight produced

Water
One square equals 800 L of water /kg of body weight produced
