Did you know that the first Egg McMuffin at @McDonalds was served in 1972? Nearly 50 years of fried egg breakfast goodness!
#NationalEggMcMuffinDay

DAR PRO Solutions @DARPROSolutions · Feb 18
Special shoutout: last week, Jamey Vance helped serve up some Popeye's chicken to the families at Central Ohio Ronald McDonald House. We are always happy to lend a hand and partner with both @RMHC and @PopeyesChicken!

Our Services

DAR PRO Solutions - a brand of Darling Ingredients, we offer three main service solutions that help our customers across the country, while supporting the communities in which we work and live.

USED COOKING OIL

UCO Equipment

Grease Trap Services

24/7/365 Customer Service Center

A partner you can trust.

Our professionally trained, uniformed and licensed service personnel use state-of-the-art grease management equipment to handle your material responsibly, thoroughly and in accordance with governmental and environmental regulations.

Kitchens*

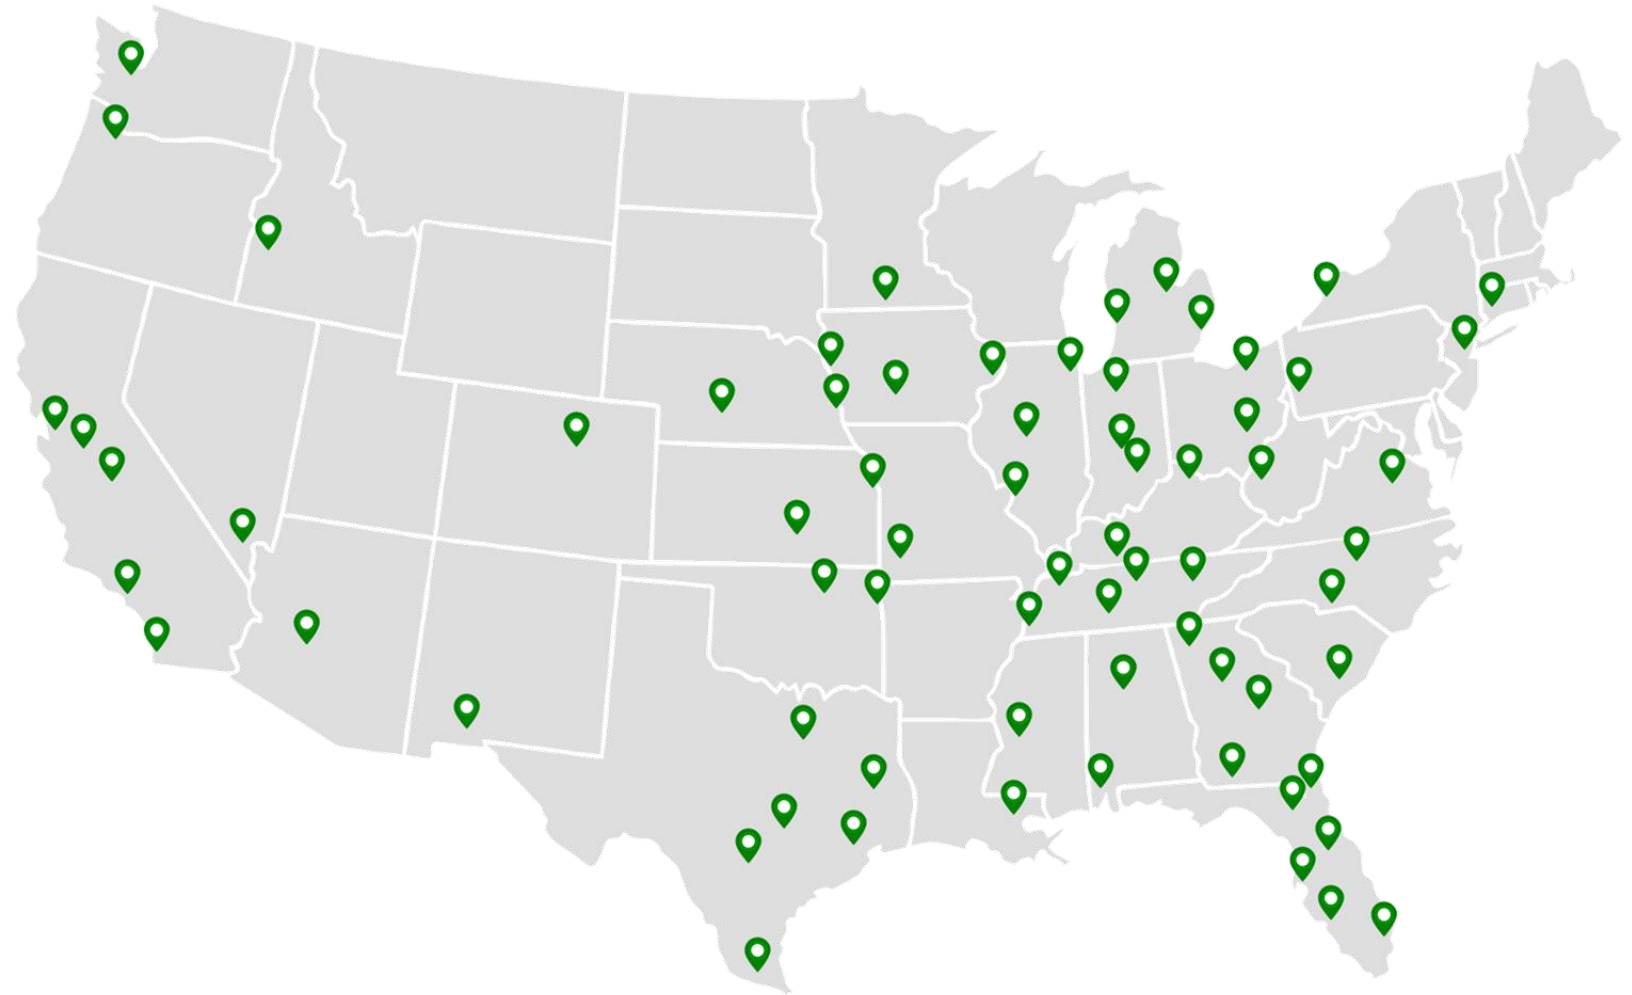

Our Used Cooking Oil Service Footprint

73 company-owned and operated UCO facilities across the USA – with our drivers trained for service and safety

Established vendor pool for third party service, if needed

A 1,500 unit fleet – a Top 15 Service Fleet in the Country

We have the Team and the Equipment to Get the Job Done - Every Day!

There is *more than one way* to simply and safely transfer your used cooking oil.

DAR PRO Solutions is approved by Corporate McDonald's to offer our service and equipment program to owners/operators.

You now have a choice for your grease service provider!

the alternate solution is here!

What does our Program for McDonald's include?

- ✓ • **ZERO Cost Equipment Solution**
 - B.O.S.S. Space Saver or Cleanstar Model
 - No charge for equipment, freight delivery, installation, training – and NO monthly fees
- ✓ • **DAR PRO's Direct Pump Connection to Fryers**
 - Continue to transfer your used cooking oil with the push of a button!
- ✓ • **Rebates**
 - Dependent upon finished market value for "Yellow Grease"
 - Pricing based on the Jacobsen Report, Illinois Market. We use previous month's average to determine current month's pricing. Rebates are based on the market average, less a .1975 handling fee.
- ✓ • **Professional Grease Trap Service**
 - Can be offered as a "bundled" package

Equipment option: B.O.S.S. Space Saver

The CEC is involved every step of the way, from initial service consultation and new customer onboarding, to scheduling service, renewing agreements, billing and more.

Reach us 24/7/365

A single point of contact for all grease needs

Multiple ways to reach us

Live agents to for service inquiries and troubleshooting

Invoicing, rebating and billing

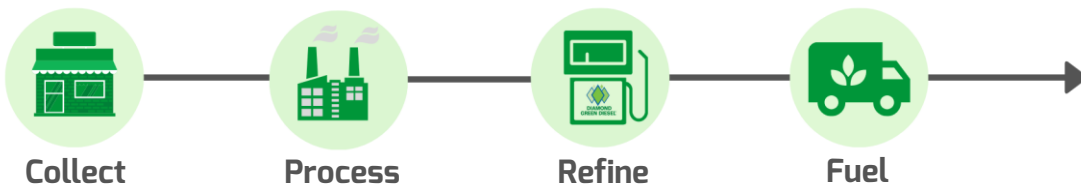

Diamond Green Diesel (DGD)

DGD is co-owned by Darling and Valero Energy, located in Norco, LA (outside of New Orleans)

This is the largest operation in North America to produce renewable diesel (or "green diesel") from recycled animal fats, used cooking oils and distiller oils.

Renewable diesel is **molecularly the same as petroleum diesel** – distributed via pipeline, rail, truck or vessel. Emits up to 85% less greenhouse gases.

Our transparent process helps close the loop and quantify the impact you are making:

275

675

+

400

Aug. 2018 - DGD expands from producing 160 million gallons to 275 million gallons annually. Annual consumption of feedstock will expand from 1.4 billion lbs. to 2.3 billion lbs.

Nov. 2018

Phase 3 expansion to increase production to 675 million gallons, targeted for 2021.

Sept. 2019

Advanced phase for new facility in Port Arthur, TX to produce 400 million gallons

A World of Commitment: Clean Air & Water

AVOIDED GHG EMISSIONS FROM FOSSIL FUEL

DGD produced 275 million gallons of renewable diesel in 2019, avoiding 2.4 million MT CO₂e.

NET WATER CONTRIBUTION

In 2019, we used 1,955 Mgal and returned 3,494 MGal of water to the environment and for reuse in our processes. We return 44% more water to the water cycle than we consume in the rendering process.
